Enrollment Experience Review w/ AO - Transcript

00:00:00

Ajlan Okman: Let's go.

Dr. Zaibis Muñoz-Isme: Nobody here.

Ajlan Okman: It's like an 8 minutes.

Laura Barcellos: Hello.

Ajlan Okman: Hello.

Sait Yucekaya: Hello everyone.

Laura Barcellos: Hi.

Sait Yucekaya: How is going?

Dr. Zaibis Muñoz-Isme: Thank you.

Laura Barcellos: I just arrived.

Dr. Zaibis Muñoz-Isme: Okay.

Laura Barcellos: Okay, let's go. Can you share

Sait Yucekaya: Yes, I was just able to um deploy the function development stuff like okay in browser and let me share

Laura Barcellos: I will follow you with the Jeta here so we can have like um a vision.

Sait Yucekaya: Mhm. Got it.

Laura Barcellos: Okay.

Sait Yucekaya: Yeah, this one.

Laura Barcellos: Okay. So,

Sait Yucekaya: And when we hear the step students

Laura Barcellos: here. Okay. Uh signing can I start there?

Sait Yucekaya: finding

Laura Barcellos: Yeah. from the beginning.

Sait Yucekaya: Okay, just relax. Oh, you're not seeing just Sorry. Let me share it with full screen. Oh god, it's like gonna crash. Yes. Now we go back to here and like create account

00:12:37

Laura Barcellos: Okay,

Sait Yucekaya: and

Laura Barcellos: this is our signing as well. And Dr. Zis, anything that we want to change here?

Ajlan Okman: Okay. So what's the purpose of we asking both email phone number? So how are we doing the verification or validation? Like if they extend the offer and say this this that that right welcome

Sait Yucekaya: Okay.

Ajlan Okman: to Aster University whatever you want to

Sait Yucekaya: Mhm.

Ajlan Okman: so I'm trying the workflow.

Sait Yucekaya: So if

Ajlan Okman: So let me just re read you off. So as a admission specialist I sent an offer to Sait. I'm guessing site clicks accept an offer link over there and then site comes to here.

Sait Yucekaya: Yes.

Ajlan Okman: Yeah, I think I how I was envisioning is we will create something like a secure magic link that will bring me to like some on boarding page or a like you know confetti is all over the place Sait welcome to Odentra blah blah and then it says like clicks I accept my offer

Sait Yucekaya: Oh, I see.

00:14:27

Ajlan Okman: Then uh then we ask this question like step one can be create your uh Odentra account cuz directly coming to account page is what if they're going to reject their offer? Are they going to come to account page again? Do you know what I mean?

Sait Yucekaya: Yes.

Ajlan Okman: Does it make sense or am I just dating myself?

Sait Yucekaya: Cool. Oh no no no I see like it's for it must directly oh not

Laura Barcellos: Because it

Sait Yucekaya: here of course there must be some onboarding but I didn't create my account but I see

Ajlan Okman: Yeah.

Sait Yucekaya: um it must be starting with onboarding when the magic link is

Ajlan Okman: Yeah.

Sait Yucekaya: There.

Ajlan Okman: And then this like account uh password that can be part of the on boarding like you know where they confirm their first name, last name, legal name blah blah right we already had like their email address, telephone everything. So we can say something like create your odent password. Does it make sense?

Laura Barcellos: If we send If we send them an email,

00:15:41

Sait Yucekaya: Yeah.

Laura Barcellos: we know their email, right?

Ajlan Okman: Yeah, we know the name.

Sait Yucekaya: Yeah.

Ajlan Okman: So

Sait Yucekaya: From admissions paid parts, we actually know their, you know, emails and stuff.

Ajlan Okman: there. All right. So then I'm joining Ether. So this one I think needs to be a little bit more entertaining. This is like too blend of a design. So what what does that like stupid box on the right to like student class of 2027 Ether with the Odentra logo. So I don't understand what's the feel we are trying to give over here. Maybe we come up with like a larger pop-up box on the left says uh I don't know how you have like a hook. It's official student you're joining us. That's a terrible hook. We should find like enough something more like catchy that they can also customize and change it later on if they want to. For example, like in back end whoever joins if we if they're like B employee and we add them to Slack, I always text them and they join.

00:17:03

Ajlan Okman: It's like welcome to the family. Now all of you guys have probably received it. maybe sus is in Turkish that might be the only deviation. So some big you know uh slogan and at the bottom uh right below that maybe like you know you have some explanation of what we are doing like you know share your story in social platforms and earn uh bookstore points right earn a points that you can use at at the bookstore And on the right side each channel you should have but with like a mockup of what they are sharing. So how would that like LinkedIn post will look like? LinkedIn right. uh the post look on the left and then hashtag mash whatever on the right like you know something that looks like a LinkedIn post like from an emulator. Same thing for Instagram. Same thing for X. I don't know like if Facebook is still really active they want their grandma to see probably it's a good idea but whatever it is like this is too blunt right and then when they share share share they earn those points they can go to I guess the next step too or they can skip directly go to the next step right but the main point is congratulating them and then making and feel like they should share this because we're giving them money.

00:18:46

Ajlan Okman: So, confetties, mities, it can all come up in this page. So, like first on boarding experience is not that good, but it's functional. I see the functionality. It's just not eye-catching. Okay, let's go to the next

Laura Barcellos: He's still guarding himself.

Ajlan Okman: Okay. So I will suggest we like stick to a type face. The Sait Yucekayais for some reason bolded in the text box. So UX wise I think this is not adding up. And then maybe we should call it like uh legal first name, legal middle initial, legal uh or legal middle name, legal last name and then preferred name as say. So for example like if my name is Alexander uh Matthew my preferred name is Alex that's fine. uh what we should say like you know what's ask them to write whatever is their legal name and then I guess preferred name and pronouns they can be side by side right because that's what I go with scroll down okay you have your ID I'm just thinking maybe like should we collect all the passport, passport, ID, that type of information in a separate page like would we slow them down now by collecting So I feel like showing them their phone number, home address, like all of that to confirm their date of birth and such is more important, you know.

00:21:16

Ajlan Okman: So, how are we gathering that information? Do we see it over here or no?

Sait Yucekaya: I know it was like that but now it's just uploading and then it will be rechecked on five minutes or something like every 5 minutes uploaded documents are parsed.

Ajlan Okman: Okay. Uh, but if we're going to parse it in the screen, I think we should still show them what we passed, right?

Sait Yucekaya: Yeah. Yeah.

Ajlan Okman: So I think they need to still visually see those fields and then when they upload their like ID probably it will be good to see the ID's preview and then what we parse up on the right side and then say like matches name matches this matches that you know so this screen is a really important screen but we are not uh getting too much out of this and then where is the contact information? So how do we find their contact info? So where do we ask or show their like phone number, email address and have them?

Laura Barcellos: It's in the next dark.

00:22:28

Ajlan Okman: Okay. Okay. Mhm. Nice. Again like this can be I think done more dense.

Sait Yucekaya: Okay.

Ajlan Okman: It's like too much scrolling.

Sait Yucekaya: I'm skipping those part. Those are

Ajlan Okman: Yeah.

Laura Barcellos: We just

Ajlan Okman: And then like non section US. I think we should like convert the uh state list to a drop down instead of having like a like how we have the country drop down. If it's US, I think we should have like a state or province drop down as well

Sait Yucekaya: H I

Laura Barcellos: Do you want less information or condensed information?

Ajlan Okman: condensed like the user experience much.

Laura Barcellos: Less space. Yeah.

Ajlan Okman: Yeah. And then like how can we do this smarter, you know? So I'm pretty sure maybe like you know we can fit city everything like in same row maybe. Right? Cuz take a look at that United States. How much space that takes and then how big of a empty space we have like user experience wise like this doesn't look good.

00:23:49

Ajlan Okman: And then I like your email, text message, call. Maybe call can be another one, right? May We kind of like add icons to them and they can like not just have a radio button select you know like how they have boxes to select so it can look a little bit nicer and in the about you I think we should ask them to upload a picture. Let me share the screen with you. So we have something similar that we are building for weekend. Do you guys remember like you guys used to submit something like a Google form to upload your

Sait Yucekaya: Yeah,

Ajlan Okman: files?

Sait Yucekaya: exactly.

Ajlan Okman: Is my screen visible?

Sait Yucekaya: Yes.

Laura Barcellos: That's

Ajlan Okman: So this is like what the newbies will submit. Welcome to back end Alex and such. So after they accept their offer, they submit this. you know, they receive a magic link for this. Does it make sense

Sait Yucekaya: Yeah.

Laura Barcellos: Yeah. Do you like this way?

00:25:02

Laura Barcellos: Like on the top like let's get started.

Ajlan Okman: on the top means?

Laura Barcellos: And then you have like the sidebar is not sidebar, stop bar.

Ajlan Okman: Yeah. Whatever. Like,

Laura Barcellos: They're like this.

Ajlan Okman: you know, if you want to solve it like this, solve it like this. You want to solve it on the left, solve it on the left. Doesn't matter. I like both of the ways. The left is just fine. It's like, you know, it just needs to be a little bit more like cleaned up design. You see all the boxes are matching over here exception of this one like you know. So basically we are asking their details first. I think this second tab and the third tab can be combined. So I pull like their role and then their team like their department they're working. So this is basically class of whatever right and then this is their major and school that you can pull directly. So in my opinion all of this and this can be in the first page easily and if I upload a head shot here right I see it.

00:26:14

Ajlan Okman: So, it cuts the white background picture or whatever and makes it fit nice and neat over here. And if I change my preferred name to Ajlan, it updates over here. So, it doesn't show my like, you know, legal name. But in the colleges, it might need to be my legal name. So if you guys want you can add like a emulator like this with the university's icon and such like ID design to make it fun. And then in my opinion this page and this page can merge right the work authorization and documents. So for you guys, if you want I even like put that into the details page. It's fine. It can be possible because you are doing the OCR. So I like say it's ID on that. Then we have a emergency contact page and a little bit more about you on like the background background page. I don't think these apply to anything. Uh then this is like a review and sign like contracts ma mer all of that whatever like you know they have to disclose and then it goes to review everything they have to do something like this so maybe like you know we can show them a student ID as well let's make one with their picture stuff and then the same picture.

00:27:55

Ajlan Okman: We use it for like their profile, you know, odent profile. All right. Say, do you want to share your screen again?

Sait Yucekaya: Yes. Yes. the housing part. Uh, passing this one

Ajlan Okman: Okay. So this one I think there is too much information on the top like living on camp on campus living on campus and then off campus. So commuting uh living with family need help deciding those I think can be gone or like merged together. So we are not uh they can decide later

uh if they live on campus what type of residence hall they want to live in. They can decide later if they're going to do off campus housing through us or on their own, right? They can decide if they're commuting from like a other type of off-campus housing that is not as approved or if they're going to Let with their family, right? So the tops over here,

Sait Yucekaya: Thank you.

Ajlan Okman: I think there should be three flavors and maybe again you can have them like the boxes that you can click instead of having like a really form like structure with radio buttons.

00:30:20

Ajlan Okman: Okay. What does this do?

Sait Yucekaya: This is for accessibility service. I guess if you're disabled or not,

Ajlan Okman: Okay,

Sait Yucekaya: I believe

Ajlan Okman: so this is a good shot. But there is no parallelism, right? So how you put like immunization records with the heart and like we have a story over there accessibility is not like that. So if they access if they need accessibility, what do we do? Like do they can they select what type of disability they have and then upload their documentation for that disability or they can only schedule a meeting? So what's the what are we trying to accomplish here? Zaibis,do you want to chime in a little bit?

Dr. Zaibis Muñoz-Isme: Yeah, you shouldn't have some kind of drop-down list for this is my disability, but you want um them probably to schedule a meeting with um their counselor and maybe submit documents.

Sait Yucekaya: What?

Dr. Zaibis Muñoz-Isme: But the only reason why I hesitate is because this we don't want all other users to be able to see this.

00:31:38

Dr. Zaibis Muñoz-Isme: So maybe it should mostly be like schedule a meeting to go through your onboarding for that.

Sait Yucekaya: So wait,

Dr. Zaibis Muñoz-Isme: I like that. Like yes,

Sait Yucekaya: what?

Dr. Zaibis Muñoz-Isme: I'd like to talk. That's a good one. But what talk to who?

Sait Yucekaya: I see. So is it okay that stuff? see this one for students like for each student they see it.

Dr. Zaibis Muñoz-Isme: That's fine.

Sait Yucekaya: Okay.

Dr. Zaibis Muñoz-Isme: But we don't want any kind of um medical documents in there. That's one of that's going to be part of the like how we set up the user profiles later and who only select few people can see this part if we're having them upload documents.

Ajlan Okman: like counseling. We can just do like a Rback and limit this to the counseling team.

Sait Yucekaya: Yeah.

Ajlan Okman: So it doesn't have to be everybody and their mothers uh sees this, you know.

Dr. Zaibis Muñoz-Isme: Right.

Ajlan Okman: But how does the counseling team do?

00:32:40

Ajlan Okman: Like don't they have like some sort of check box on like what are the things that are their disabilities or like how do they keep the proof of those?

Dr. Zaibis Muñoz-Isme: They would have their own most of them have their own CRM. Both of them have their own CRM. Um,

Ajlan Okman: Yeah.

Dr. Zaibis Muñoz-Isme: and they're like private or locked, so like nobody sees them.

Ajlan Okman: Okay. All right. So like do we like then worry about adding it over here?

Sait Yucekaya: Interesting.

Ajlan Okman: Can we just make it about immunization records and then they contact

Dr. Zaibis Muñoz-Isme: I think immunization is fine because that's part of the enrollment record, right? Uh,

Ajlan Okman: Mhm.

Dr. Zaibis Muñoz-Isme: and not every school has like an advanced CRM situation.

Ajlan Okman: Yeah.

Dr. Zaibis Muñoz-Isme: Um like American I just found out has one one portal for C only counseling and student health is in there but they had to buy two instances because counseling cannot see health and health cannot see counseling and I was like that's really stupid.

00:33:40

Dr. Zaibis Muñoz-Isme: Um so I think this is fine for the student to be able to upload but I think

Sait Yucekaya: Is it

Dr. Zaibis Muñoz-Isme: we have to pay attention to who can see this on the staff

Sait Yucekaya: empty?

Dr. Zaibis Muñoz-Isme: user side.

Ajlan Okman: Okay.

Sait Yucekaya: interesting but not.

Ajlan Okman: Oh, sorry.

Dr. Zaibis Muñoz-Isme: Jesus.

Ajlan Okman: Can I sit trick this meeting? Can I steal the screen?

Sait Yucekaya: Yeah.

Ajlan Okman: Transcripts are going to comp. So, uh, you know, like the remote work policy, we want everybody to have their camera on and such, right?

Sait Yucekaya: Yeah.

Dr. Zaibis Muñoz-Isme: Mhm.

Ajlan Okman: Sometimes your house may not be like in a state that you want to share your uh exactly like you know Zaibis a all of us have virtual background except me because I put a lot of time and painting this uh wall just spec for this reason. Rest of the house is like you know going crazy.

Sait Yucekaya: Yes.

Ajlan Okman: So they asked Yella to create like a virtual backgrounds

Dr. Zaibis Muñoz-Isme: Mhm.

00:34:54

Ajlan Okman: or like zoom.

Dr. Zaibis Muñoz-Isme: I like that.

Sait Yucekaya: Nice. Strategy

Ajlan Okman: Does it look like automa uh like a type of thing people

Sait Yucekaya: people

Ajlan Okman: ide?

Sait Yucekaya: work like CEO.

Ajlan Okman: Yeah. If I have my laptop here, so how am I working? You know, so that's my question.

Sait Yucekaya: A good one. So, one better version of his This is nice.

Laura Barcellos: This person is working outside the office. This one is like the

Ajlan Okman: Yeah. working from like already

Laura Barcellos: hole.

Dr. Zaibis Muñoz-Isme: The lounge.

Ajlan Okman: launch. Then they have like this building

Laura Barcellos: This looks good.

Ajlan Okman: bright.

Laura Barcellos: Acceptance. Except the person is not at the table at all and it's

Sait Yucekaya: on the table.

Laura Barcellos: alone.

Ajlan Okman: Yeah.

Laura Barcellos: This is amazing. Like this is great. Perfect. Yeah.

Ajlan Okman: What about this? Still same phenomena.

Dr. Zaibis Muñoz-Isme: I saw this thing uh this weekend online that said he's like an office designer and he's like the modern office worker likes to walk around.

00:36:33

Dr. Zaibis Muñoz-Isme: So he redesigns offices like this and he makes your your desk like one it could be a standing desk and it's in the middle of the room and then there's a track around so people who take a lot of

Sait Yucekaya: Let's go.

Dr. Zaibis Muñoz-Isme: like calls that like to walk around and then it like you can see how many laps you do in a day

Ajlan Okman: Yeah.

Dr. Zaibis Muñoz-Isme: like tracks in your office. I was like that's so smart.

Laura Barcellos: You are in the front of your notebook web. Elves.

Ajlan Okman: Yeah. Right. So that's interesting.

Sait Yucekaya: Yeah.

Ajlan Okman: And then like uh how do I flip my background?

Laura Barcellos: No, it's correct. is only flipped it for

Dr. Zaibis Muñoz-Isme: Yeah, it's FL for you. We see it correctly.

Ajlan Okman: Really?

Dr. Zaibis Muñoz-Isme: Yeah, cuz it's like you have to see if it's mirrored.

Sait Yucekaya: Yeah.

Ajlan Okman: That's really interesting.

Dr. Zaibis Muñoz-Isme: Yeah, see I see it correctly. We have to make it so it looks like you're sitting at the desk.

00:37:37

Sait Yucekaya: Okay.

Ajlan Okman: Yeah. So,

Sait Yucekaya: Yes.

Ajlan Okman: but how would you explain it in Chinese to Yala?

Dr. Zaibis Muñoz-Isme: Make it seem like I'm sitting at the

Ajlan Okman: All right, let me just send this to All right. My apologies. Shall we go back?

Sait Yucekaya: F.

Dr. Zaibis Muñoz-Isme: distract.

Ajlan Okman: Yeah, I get this. So yellows.

Sait Yucekaya: F.

Ajlan Okman: Wait

Sait Yucekaya: 10 guardian.

Ajlan Okman: a minute. At the United we have something called like Orion as like a design template. It's a library. So every time let's say it's a currency they have like a what is this shape like uh rectangle

Sait Yucekaya: Brace it.

Ajlan Okman: with yeah whatever it is uh like you know rounded corners. So for example the left side always has like the input type. So if it's let's say date there is like a a little calendar over there right? If it's time there's like a little clock there. If it's email, there's like a mail over there like and then phone.

00:40:29

Ajlan Okman: There's like a phone and then you have to pick the country as next right next to it. Then it does the format check. Do you know what I mean?

Sait Yucekaya: It's

Ajlan Okman: So I feel like we need to come up with a standard library for all of these forms dropdowns how they look and then we approve those looks cuz there are going to be a lot of forms we are creating and then I think we're spending tokens for nothing. Can we like create a skill that chooses the right

Laura Barcellos: Oh,

Ajlan Okman: I think we will just waste time if we do this with yellow. Can we just put like a chat to the agent or something?

Sait Yucekaya: Yeah. Yeah, we can select one. Um like there's tons of it but like uh one with you know going along with you know the regular uh font type and stuff. I can send you like couple of them and then we check which is good looking and then make it als Oops.

00:41:48

Sait Yucekaya: This is not right. See what I

Laura Barcellos: in a preview here also.

Sait Yucekaya: Yeah. Wait, it was like previewing disp again. Interesting. Yeah.

Ajlan Okman: So the student photo like this one can be more like how we have it in back end with ID and such.

Sait Yucekaya: Mhm.

Ajlan Okman: Then after that uh Zaibisdo you know how the ids are given? Uh for example at UF they ship it to you. They mail it, they print it if you request it or you can go to security office but you have to upload your picture and such in advance.

Dr. Zaibis Muñoz-Isme: Yeah, most schools are moving to either upload via the portal or um some of them use a new there's a new company that's like um I forgot the name of it right now, but especially schools that are that are doing away with ID So, it's like a mobile ID. So, a lot of schools are doing that. Um, I forgot the name of the company that did it.

00:43:35

Dr. Zaibis Muñoz-Isme: I did it a couple years ago at Hofra. Uh, but not all schools print it, but if you want it printed, you have to like go to the ID office to pick it up.

Ajlan Okman: Okay.

Dr. Zaibis Muñoz-Isme: But they would Yeah,

Ajlan Okman: So moving

Dr. Zaibis Muñoz-Isme: I think I think they will be fine with uploading a photo. The only problem is like how do we make sure that it's like a photo of them and not something inappropriate.

Ajlan Okman: Oh, that's easy. Like cuz we have like their passport, massport, everything. So we can quickly like you know refer to that and then clean up anything. So for example at weekend when somebody upload their picture. It cleans the headshot up including like the background and such. So if they have glasses at the top of their head, it removes it. It removes any air pod that type of things. and then it puts it in a nice background and then pop background for the ID

Dr. Zaibis Muñoz-Isme: Mhm.

00:44:35

Ajlan Okman: purposes. So we can do something similar over here probably.

Dr. Zaibis Muñoz-Isme: Okay.

Ajlan Okman: So let's make this like you know more about the student ID them

Sait Yucekaya: Thank you.

Ajlan Okman: providing their picture and get my virtual ID. I also need I would like a physical ID. I would like physical it to shipped to my address. I will be picking up the physical ID from security office you know that type of stuff and then we can use that picture not only for their ID that we will also emulate over here but we will use that for like their portal login and such you know so I will suggest you bring

Sait Yucekaya: Yeah, the profile photo.

Ajlan Okman: that like in the earlier on stage you know so maybe we do like offer you started with, right? Let's do it again. First is offer and you go back to the offer stage. So over here that's it. Okay. Okay. So over here we spoke about like adding more of those verification information and then the ID needs to change right so if they're international student we want passport for for them to upload their passport if they're domestic they need to

00:46:11

Sait Yucekaya: Mhm.

Ajlan Okman: upload their state ID right

Sait Yucekaya: Yeah.

Ajlan Okman: how come they're able to change that or if they change that like can we make that again like more like a button? So I am international uh you know US whatever you call like you know US national uh US

Sait Yucekaya: Yeah, I see.

Ajlan Okman: citizen whatever it's called uh it can be also permanent resident right so whatever those categories are basically US-based non US-based what is it called officially in higher education world, right? And then you pick and based on that the document we ask from them needs to change, right? If they're international, probably we want their uh passport of their country and then probably you want if they're US based there like state ID your driver's license.

Sait Yucekaya: Yeah, the premium also is changed. I see. Got it. So next their contact information.

Ajlan Okman: Mm- Okay. Yeah, we spoke about this, right? We were going to clean it up. Whatever we can do, let's try to make sure like, you know, we scroll less because I I don't feel like you can merge the contact information and about you

00:48:12

Dr. Zaibis Muñoz-Isme: Okay.

Ajlan Okman: together. If you go to contact,

Sait Yucekaya: Yeah.

Ajlan Okman: how reaches you, right? So you see that email and the phone number how they're full length text.

Sait Yucekaya: Yeah.

Ajlan Okman: I think that's waste of plugs. Same thing with like the street address and apartment and unit. What street address is going to be that long?

Sait Yucekaya: Yeah.

Ajlan Okman: There's a lot of scrolling in this, you know. All right.

Sait Yucekaya: Then if Yeah,

Ajlan Okman: So

Sait Yucekaya: it's can also Good.

Ajlan Okman: overall, I think it's going to be almost the same feedback all over. There are a lot of steps, a lot of scholar need step that can be more condensed. So how do we improve this user experience and how long it will take? Do you think we can fix this today or by

Sait Yucekaya: Hey.

Ajlan Okman: tomorrow?

Sait Yucekaya: Um by tomorrow DSA it should be good I believe. Um why okay why this is like yeah it the things that you mentioned are like good to be finalized by end of today unlike the additional feedback it will be good to go on the tomorrow's DSM.

00:49:52

Sait Yucekaya: Uh yeah, I got the points like the most like preview like most good visuals like what you have on weekend and yeah condensing stuff. One more one more thing. Um let me think how to put it. Uh should how what do you think about this? Like for example when I use some third party authentication like for I don't know when I sign up and they want to identify my you know if I really say it you know asking they first like ask my documents like ID and password whatever there is like and then based on that they extract all the information right and then they ask me okay these are the information that we

Ajlan Okman: Yeah.

Sait Yucekaya: got but like for example this is missing this is missing etc. So after you got your offer, how about like asking some documents because like about you can be like filled with your ID first and

Ajlan Okman: Yeah.

Sait Yucekaya: like I don't know how housing is like done.

Ajlan Okman: Okay. So, There's a company called ID me. they are really big in US.

00:50:59

Ajlan Okman: They do the same thing. So they present it like let's make sure that it's you right. That's that's what they say. Then after they ask to take a picture of your driver's license front and back and then you

Sait Yucekaya: Thank you.

Ajlan Okman: pass they cross check all the information with the remaining things and they show you and they get more information if they need. So after the offer they accept right congratulations. Let's get started. But first, let's verify it's you if it's a passport

Sait Yucekaya: got it.

Ajlan Okman: like so we may be identify if they're international or uh domestic.

Sait Yucekaya: Mhm.

Ajlan Okman: So probably we know that from common app but I'm not sure research if not at we

Sait Yucekaya: Yeah.

Ajlan Okman: have US-based non US-based we give them the same thing then if it's US-based we ask driver's license that they take front and back picture and upload and most of the time they have like a guide so on the camera there's like a translucent like

Sait Yucekaya: Yeah.

00:52:11

Sait Yucekaya: Yeah.

Ajlan Okman: outline that looks like a driver's license with the picture and such and then at

Sait Yucekaya: Yeah.

Ajlan Okman: the passport they have like a translucent again line art that looks like a passport with the MRZ at the bottom picture because all the passports they look alike right so we do something like that capture their identification

Sait Yucekaya: Yeah. Yeah.

Ajlan Okman: first then we show them let's Let's confirm page, right? About you page. This is what we know about you so far. Please confirm and fill up fill out the missing uh such and such. Then they confirm fill it up. I suggest like you know we next step we ask like there it's about the student ID. So we say upload your pictures or your student ID and then we show them like

Sait Yucekaya: Mhm.

Ajlan Okman: a emulated way of it and we say how would you like to receive it electronic

Dr. Zaibis Muñoz-Isme: Oops.

Ajlan Okman: physical something like that and then I think emergency contact is easier right so you definitely know your emergency contact.

00:53:37

Ajlan Okman: So it needs to be like a snowball technique.

Dr. Zaibis Muñoz-Isme: Okay.

Ajlan Okman: You know what you know and have least resistance ask first. So emergency contact is I think easier than housing. Uh what's uh what's under campus life again?

Sait Yucekaya: It's the accessibility and like immunization records.

Ajlan Okman: Okay. Yeah, that's maybe we call like health and wellness or if you want to call campus life, let's call campus life.

Sait Yucekaya: Spider.

Ajlan Okman: I thought you were going to something about like their interests like clubs, clubs, that type of things. I know like it sounds stupid to aspect in on boarding but it's I think really important for us to personalize the content. So we removing that I think will make us a CRM.

Sait Yucekaya: Okay. Like one thing also like in like online like normal app on boardings they actually do not ask like hard to upload documents like immunization and stuff those are already on enrollment. So what they do is actually what you said like asking some questions okay what you're interested and stuff ID is simple because it's like always like in 5 m diameter nearby you uh but like for the immunization records you need to go computer and like do stuff etc

00:55:05

Ajlan Okman: Yeah,

Sait Yucekaya: etc

Ajlan Okman: I think records you should I agree with you. Leave it to the enrollment checklist.

Sait Yucekaya: Yeah.

Ajlan Okman: Same thing with accessibility.

Sait Yucekaya: Yeah.

Ajlan Okman: So I don't think we should get into accessibility business later on like we understand the space more and then we see that they don't they don't have to have a CRM. They can just use us in a way.

Sait Yucekaya: Mhm.

Ajlan Okman: Perfect. Later on we will do that but now

Sait Yucekaya: Okay. I think Sorry.

Ajlan Okman: there's no

Sait Yucekaya: Sorry I interrupted.

Ajlan Okman: I'm

Sait Yucekaya: Yeah. Yeah. I I think I got it. I got stuff. Um, anything extra? I believe not. But I I I got the point. Like first um like I don't know check your uh ID and stuff. Maybe face recognition. I don't know for later stages, not for now functionality, but this is what I did for today to be honest. and then asking the questions like okay we extracted this from your ID and like here is unit field done and then here is your student ID completed take your photo and stuff that part is done and then campus life like you said the interests and the housing also record the campus life and then things to sign always daily signing starts at like fura and like I don't know if there is anything else um like adding parents uh information

00:56:39

Sait Yucekaya: and that's it I guess and let's upload more sign and like I don't know take photo or something and then on boarding is done

Ajlan Okman: Mhm.

Sait Yucekaya: okay just for summarization it was okay got Okay, got it. Offer about your housing records. This is purple and signature. I am awesome deposit.

Laura Barcellos: question here regarding the deposit. Are we going to integrate with something like stripe or I don't know.

Sait Yucekaya: Yeah,

Ajlan Okman: We would probably just go to to their like touchn net whatever they're using

Sait Yucekaya: we

Ajlan Okman: it and then whoever pays their deposit probably they have like a data

Laura Barcellos: Okay.

Ajlan Okman: set in the back end. We can check if they paid it that data set but that sounds like a futurist

Laura Barcellos: Mhm.

Sait Yucekaya: Mhm.

Ajlan Okman: problem.

Laura Barcellos: Okay. Uh now I would like to see my enrollment. So we have this uh awarded screen and then my enrollment.

Ajlan Okman: Yeah. So over here the fastest function stopped working. Something happened.

00:58:11

Ajlan Okman: If you click the fastest but there is no more durations. For some reason, the durations are gone.

Sait Yucekaya: Oh,

Ajlan Okman: You guys,

Sait Yucekaya: wait.

Ajlan Okman: you guys used to have the do and then the durations.

Sait Yucekaya: Uh, it's it's like this part. Is that correct? I can see it was this October

Ajlan Okman: So, smart order,

Sait Yucekaya: 15.

Ajlan Okman: smart order is basically how many things depend on this plus how uh how long does it take for you to do

Sait Yucekaya: Yeah.

Ajlan Okman: it plus uh what are due dates.

Sait Yucekaya: Mhm.

Ajlan Okman: So, smart orders project management name is critical path analysis. If you guys want to read it more without my Turkish accent, you will probably appreciate it. It's called critical path. So we have to sort it by what's the most critical thing and then do soon is basically just plain old sorted by whatever is due and then the fastest is okay I want to like get some progress I want to earn extra points but I don't have that much time you know what whichever of these will take me the fastest so my driver's license uploading a picture if I haven't uploaded Probably it's going to be less than two minutes, right?

00:59:39

Ajlan Okman: I will just go back check.

Sait Yucekaya: Yeah.

Ajlan Okman: Done. Confirming my emergency contact. Easy. One minute.

Laura Barcellos: This is a critical feature because we have a study that says is that this is what reduced mouth the most to have very specific path for the students to follow.

Sait Yucekaya: in exchange. Okay, I took that note for the thing that what is the disappearing due date and like how long it takes and also I guess the task do not have um how long it takes to complete per task that's why do soon and like fastest are same basically as far as I see okay upload documents This the same. What connection was your childhood? Okay. Something going on. Oh my god. What? What is going something happened with my

Laura Barcellos: He got logged out.

Sait Yucekaya: Yeah. Also,

Dr. Zaibis Muñoz-Isme: What is this f*****

Sait Yucekaya: okay, let me join again.

Laura Barcellos: Maybe maybe we should take a look on the expiring part of the thing like maybe we are being yeah unlocked it in x amount of

01:01:52

Sait Yucekaya: Yeah. Then you let's use this. Mhm. Okay. Let's use this the dummy one since we completed the onboarding. Okay. For Okay, these are completed here. This works and continue upload documents. But this is transcript.

Dr. Zaibis Muñoz-Isme: Excellent.

Laura Barcellos: question is this is wired with the staff part this is properly connected if I open something here in a new user and go to the staff port will I see this transcript that's my session cuz in in my uh considering the road map this is done I upload something there and I

Sait Yucekaya: Mhm.

Laura Barcellos: receive something here.

Sait Yucekaya: Uh yeah,

Dr. Zaibis Muñoz-Isme: Okay.

Sait Yucekaya: the answer is yes.

Laura Barcellos: Maybe not the dummy one.

Sait Yucekaya: Yeah, for example, here this is my transcript just added by

Laura Barcellos: Great.

Sait Yucekaya: Ada uh the dumb user and Edward is processing it. Yeah, this is my terrible transcript. Disregard it. But yeah,

Laura Barcellos: This is a C car dealer or something.

Sait Yucekaya: the processing.

01:03:27

Sait Yucekaya: No, this is this is my real transcript. It's my with my terrible notes. Yeah. Yeah, I was at the right. But yes, uh it it writes on the database and like when you check on the staff side, you can those students just

Laura Barcellos: will be enrollment uh financial aid not student dash. Yeah.

Sait Yucekaya: Yeah, this one. Okay. And then it's like completed.

Dr. Zaibis Muñoz-Isme: I don't

Sait Yucekaya: Yeah, but uh Okay. You were able to check the status of the task.

Dr. Zaibis Muñoz-Isme: switch. That's Let's

Sait Yucekaya: It is like once it's like completed, it is there. But like once it is got rejected there must be some message.

Dr. Zaibis Muñoz-Isme: get

Sait Yucekaya: So let me check it quickly. Um out this We got a GPA. Let's say

Dr. Zaibis Muñoz-Isme: She's 19.

Sait Yucekaya: Yeah, the transcript was uploaded and it was under it is actually still under the completed but now it's again here

Laura Barcellos: We need a feed.

01:05:35

Sait Yucekaya: and we were Sorry.

Laura Barcellos: We need we need to put a proper feedback. Say I'm sorry. We need to put a proper feedback like uh more

Sait Yucekaya: Yeah, it's on the notification,

Laura Barcellos: visible. Yeah, but it should be more visible.

Sait Yucekaya: but it must be on the task.

Laura Barcellos: Yeah. like, hey, your transcript was rejected for X, X, Y, and Z because of whatever,

Sait Yucekaya: Mhm.

Laura Barcellos: you Yeah.

Sait Yucekaya: Yeah. Yeah. Yeah. Exactly. So yeah, when you check it actually it must look like that for sure.

Laura Barcellos: Yeah.

Sait Yucekaya: Yes. Terrible.

Laura Barcellos: I I always do user stuff.

Sait Yucekaya: Okay.

Laura Barcellos: So I'm the one who would not see the notifications and will think that it's a bug in in the system and saying, "Hey, this university is not helping me." like this is a lot louder thing. So like let's make very very clear to the user.

Sait Yucekaya: I see. Um, okay. So, this is actually how enrollment mode works for now, I believe.

01:06:41

Sait Yucekaya: I don't know if Edward is wired in fully on this test one.

Laura Barcellos: You can test. I test with Dia on Friday.

Sait Yucekaya: Yeah, Daria is uh it's like V in the GCP one. Yeah, I guess so.

Laura Barcellos: But yeah, you can ask the two,

Sait Yucekaya: Wow.

Laura Barcellos: three, four thing. Yeah, it's working amazingly.

Sait Yucekaya: Nice. Okay.

Laura Barcellos: So I guess we can work with my enrollment and on boarding not in this uh you know order. So on boarding and my enrollment and then we can schedule another session to talk about appointments, my degree and then we go to reviewing and approving stuff. That makes sense because I think over an hour we we are going to start to lose our

Sait Yucekaya: Yeah.

Laura Barcellos: attention.

Sait Yucekaya: Mhm. Yeah. No, no, I got what we required so far. Like the rest is actually what I was going to work till Wednesday. The appointments. I don't know if it's like working. It's just a calendar as far as I know. Uh but yeah.

Laura Barcellos: Yeah.

Sait Yucekaya: Okay. I see. So I will draft something quickly and then we will see on the not do we have end of date today? Yeah, we have. Okay, perfect. So I will join that one as well and let's show it.

Laura Barcellos: Hey, thank you S. Anything else?

Sait Yucekaya: Perfect.

Laura Barcellos: Dr. Zis, anything else? You're good.

Ajlan Okman: What else we need to review?

Laura Barcellos: Okay. No. Sait will bring some news on our EOD.

Sait Yucekaya: Mhm.

Ajlan Okman: Okay, so we are just reviewing these ones.

Sait Yucekaya: Yeah. Yeah.

Laura Barcellos: Yeah.

Ajlan Okman: Okay.

Laura Barcellos: Yeah.

Ajlan Okman: So now whatever we just put together Laura write based on the meeting transcript some like blur note for as like review comments and swing them back to design. Okay.

Laura Barcellos: Okay.

Ajlan Okman: All right. Bye.

Laura Barcellos: Bye.

Sait Yucekaya: Okay. Bye-bye.
